

Jacek Chmiel – Chief Technology Officer, Member of the Board

Software creation is his passion since he was 8 years old and for last 22 years he has been doing that for living. He is genuinely interested in trends of IT services and technologies as well as the increasing awareness of the role of tech in business.

He has got many years of professional experience, gained from both the positions of client and supplier, gained in i.e. Groupe Casino, Astech, Altkom. He performed every role in the manufacturing process, managed complex projects, he was successful in creating concepts of complicated software solutions and consulting services. He was a key figure for starting one of software-houses. He led a team of 200 specialists, defined their career paths, managed the system of competence development and recruitment process. He participated in audit conductions, defining and enforcing of both the management and manufacturing processes, was the owner of SDLC process. He was engaged in technological R&D (including APIs, cloud, AI, blockchain), providing substantial support for marketing and sales activities and emerging new services on the market. Despite his experience gained mainly in the enterprise industry (primarily in the financial sector), he does not leave aside other formulas. He is one of the inventors of architecture of a unique in the global scale solution – OnStage. He joined IT Kontrakt in July 2018, taking the post of Chief Technology Officer and Member of the Board.

Jacek holds a diploma in Information Technology obtained at the Warsaw University of Technology. As for hobbies and interests, he loves the history of the 20th century and photography.
